### PRODUCT DESCRIPTION

The Dual IG Storage Rack Unit is a free loading harp storage rack mounted on four (two swivel and two fixed) heavy-duty casters with one floor lock. The floor is flat with glass handling controlled by a dual set of fixed dividing rods.

### MECHANICAL FEATURES

The rack base and back vertical members are all MIG welded construction, arms are bolted to the vertical back and the harp strings are removable, vinyl tube covered, so that the vinyl tubing can be replaced when it becomes worn. The rack is mounted on four casters (two swivel & two fixed) and rack flooring contains four (4) strips of HDPE glass contact surfaces.

### SPECIFICATIONS
